

TRANSACTION HUB

Santander Cash Nexus Transaction Hub is a solution for centralised management of mass transactions. This tool combines the best security technologies and 24x7 procedures. Additionally, it offers you a channel for your collection and payment transactions in various countries and using international standard formats. The solution automates an end-to-end process while ensuring correct processing and removing payment duplicates.

Our solutions for you

Simplify

Transaction HUB offers you direct processing of large volumes of domestic and international transactions without having to keep track of several online banking profiles.

Local offer

Transaction HUB features a powerful offering of payment and collection rates for every individual country using the same international format, to meet your company's treasury needs.

Efficiency

Maximise your efficiency with greater centralised control of your transactions and easy integration with your ERP/TMS.

Reconciliation

Transaction HUB sends you responses concerning your payment status; it uses your own references for better monitoring of your transactions.

Remote authorisation

This feature allows you to give autonomous permission to payments and collections sent from your ERP, using the Cash Nexus app or Cash Nexus Portal.

Optimized Security

Transaction HUB guarantees maximum security for data authentication, encryption and integration, in addition to audit checks.

Why Santander Cash Nexus?

Santander Cash Nexus means transparency, efficacy and personalisation. This Cash Management solution optimises your company's cost savings, return and cash flows in addition to offering you complete control over your business worldwide and maximising your earnings.

Banco Santander is the best option for long-term associations, and guaranteed commitment.
